Dear Mr. Appel:

On September 3, 2014, the U.S. Environmental Protection Agency (EPA) inspected your Dairy Facility and Heifer Facility to evaluate its compliance with the Clean Water Act (CWA). I would like to express my appreciation for your staff's time and cooperation during the inspection. The inspector did not indicate any violations of the CWA at the time of inspections.

Please follow up with the Washington State Department of Agriculture, the Washington State Department of Ecology, and the Whatcom Conservation District to ensure your facility is in compliance with the state and local regulations. If you have any questions concerning this matter, please call Steven Potokar, CAFO Enforcement Coordinator, at (206) 553-6354.

Estimate the total work effort (to the nearest 0.1 work day), up to 99.9 days, that were used to complete the inspection and submit a QA reviewed report of findings. This estimate includes the accumulative effort of all participating inspectors; any effort for laboratory analyses, testing, and remote sensing; and the billed payroll time for travel and pre and post inspection preparation. This estimate does not require detailed documentation

Column 70: Facility Evaluation Rating. Use information gathered during the inspection (regardless of inspection type) to evaluate the quality of the facility self-monitoring program. This section is self-explanatory except for "Other Facility Data," which may include new information not in the permit or PCS (e.g., new outfalls, names of receiving waters, new ownership, other updates to the record, SIC/NAICS Codes, Latitude/Longitude).

Section C: Areas Evaluated During Inspection

Check only those areas evaluated by marking the appropriate box. Use Section D and additional sheets as necessary. Support the findings, as necessary, in a brief narrative report. Use the fleadings given on the report form (e.g., Permit, Records/Reports) when discussing the areas evaluated during the

Section D: Summary of Findings/Comments

Briefly summarize the inspection findings. This summary should abstract the pertinent inspection findings, not replace the narrative report. Reference a list of attachments, such as completed checklists taken from the NPDES Compliance Inspection Manuals and pretreatment guidance documents, including effluent data when sampling has been done. Use extra sheets as necessary.

*Footnote: In addition to the inspection types listed above under column 18, a state may continue to use the following wet weather and CAFO inspection types until the state is brought into ICIS-NPDES: K: CAFO, V: SSO, Y: CSO, W: Storm Water 9: MS4. States may also use the new wet weather, CAFO and MS4 inspections types shown in column 18 of this form. The EPA regions are required to use the new wet weather, CAFO, and MS4 inspection types for inspections with an inspection date (DTIN) on or after July 1, 2005.

Data Collection Process:

Inspector is responsible for collection of ICDS data during the on-site inspection.

Inspector should complete the ICDS during or immediately after the inspection is conducted.

Inspector should forward completed ICDS to first-line supervisor/designated alternate within five (5) days after returning from either a single inspection, or series of inspections.

The <u>first-line supervisor/designated alternate</u> should ensure ICDS data is collected & reported, and that the data is complete and accurate. Once the supervisor review is complete, the ICDS should be forwarded to the data entry person. For CWA inspections, forward the ICDS to the attention of Jeannine Brown by any of the following methods: Mail to U.S. EPA Region 10, 1200 6th Avenue, Suite 900, Mailstop OCE-184, Seattle, WA 98101; or email to <u>Brown.Jeannine@epa.gov.</u>
